

LISTING OF THE CLAIMS (1-19)

Claims 1-10 (canceled) ✓

C¹ Claim 11 (New): A method for performing a partial calibration of an image capture system comprising a scanner and a host computer, said method comprising:

In response to a condition recognized by the scanning system, retrieving operational data from a memory element of a host computer, wherein said operational data is restricted to data from previous scans and calibrations;

evaluating data from an operational sensor of the image capture system;

determining that an operational condition is not within a norm; and

issuing a control command to adjust said operational condition.

Claim 12 (New): The method of Claim 11, wherein said operational condition is a gain of a CCD amplifier.

Claim 13 (New): The method of Claim 11, wherein said operational condition is a home position.

Claim 14 (New): The method of Claim 11, wherein said operational condition is a DC offset.

Serial No.: 09/629,041

Examiner: KAO, C.C.G.
Art Unit: 2882

Claim 15 (New): The method of Claim 11, wherein said operational condition is a lamp uniformity.

Concl¹⁰*
Claim ~~15~~¹⁶ (New): The method of Claim 11, wherein the recognized condition is a connection of a cable.

Claim ~~16~~¹⁷ (New): The method of Claim ~~15~~¹⁶, wherein said cable is a universal serial bus cable.

*Rule
11.26*
Claim ~~17~~¹⁸ (New): The method of Claim 11, wherein the recognized condition is a home position failure.

Claim ~~18~~¹⁹ (New): The method of Claim 11, wherein the recognized condition is a lamp temperature.

Claim ~~19~~²⁰ (New): The method of Claim 11, wherein the recognized condition is a an exposure balance between color channels.
